

Dionda Fugitt

As a modern day Renaissance woman, Dionda Fugitt has worn many hats, but writing has always held the title as her first love.

As the Author of *Adjust Your Crown: The Little Ladies' Secret Handbook*, Dionda's goal is to reach as many young ladies as possible through her book as well as mentor programs.

"What happened to talking about self care, self worth and value? Before walking out the door each morning, I want to somehow remind every little lady to look in the mirror and tell herself how SHE IS WORTH IT and how no one else has the same sparkly DNA as she does. This book was written and designed to help recharge our little ladies and help them regain confidence, ambition, passion and self awareness. If nurtured, these qualities become great strength which in turn birth empower young ladies, who then become empowered women."
